Our show consists of songs and stories (including Gospel) of Johnny Cash and of some of the people that were closely associated with him throughout his life and career such as June Carter Cash, The Carter family, The Tennessee Three, Carl Perkins, "Cowboy" Jack Clement and Sam Phillips to name a few.

The show is somewhat interactive with a bit of humour during some of the story telling parts. This is considered to be a "family oriented" show.

The regular show runs for 2 hrs. + with a 20 minute intermission, however can be adjusted to from 60 – 90 minutes without intermission if that suits your requirements.

In the spring of 1955 Johnny Cash walked into the legendary Sun Recording Studio in Memphis Tennessee. The music world was never the same.

Cash Back performs the music of one of the world's greatest music icons through authentic versions of songs that made him legendary, ranging from the fifties to the ninety's including gospel. They respectfully and lovingly reference the late, great Man In Black's early Columbia and Sun Records sound. They try to keep the Cash sound as authentic as possible while adding their own flavor to the mix. Cash Back draws from a large repertoire of songs either written and/or performed by Cash, including the June Carter Cash duets. Cash Back also pays tribute to the Carter Family whose music was so influential and who became an integral part of Johnny Cash's life.

Members of Cash Back have been playing music in the amateur/semi-pro field for many years. After taking several years off from playing they decided that they wanted to start playing again but this time they wanted to do something different. Johnny Cash music had always been a part of their repertoire and actually was Dave's biggest influence in music in the sixties when he was learning to play. Doing a Johnny Cash tribute seemed like the perfect fit, so in 2004 they took their tribute show on the road. It is met with great enthusiasm and has received many accolades along the way. The tribute show that Cash Back delivers appeals to anyone from 9 to 90 and showcases the group's reverent and genuine love of Johnny Cash's music.

- Lloydminster Legacy Centre
- Manitou Beach
- Maurice Taylor Auditorium Tisdale
- And many places in between.

Johnny Cash was one of the greatest musicians of all time. He touched the hearts of music fans with his distinctive baritone voice and his critical and unconventional texts. At the tender age of 12, he was penning songs and dreaming about a musical career. In total he wrote over a thousand songs and released dozens of albums. A prolific songwriter and an astute selector of songs from the pens of others, he has reached out to folk and rock sources for his enormous repertoire, and his music has consistently appealed to both rock and country audiences. He left a body of work that is there for anybody to discover and it will exist for ever.
